

Things to consider in the ORIGINAL in the hoop embroidery design:

- Must have unique colors for each step that must occur on its own.
- Use grid lines to line up the copy and paste.
- Be efficient - if you want one left and one right, make your original to be TWO designs, one left one right.
- Keep spacing in mind. Will you be trimming at any steps?
- Always save your design as a new file so that your original is not mucked up.

Enthusiast time saving tip:

- Select item(s) and use instant repeat
- Use mirror and flip of instant repeat to conserve space

Color Sort:

- Always use the New View to preview what will be sent to the machine.
 - Sew Simulator to double check in case Remove Hidden Stitches kicked in
- The max number of colors you can save is Colors minus Needles
- Use the tolerance slider to adjust

I would appreciate it your use my affiliate link to purchase your Embrilliance software. For sale pricing on the Embrilliance software, use this link to get to the [Embrilliance Store](#) and use promocode **BUBBLES19**

When used with my link above (click on the Embrilliance Store text), the promo code will give you an additional 10% off the prices shown in the Embrilliance store. Promo code is good through May 15, 2019
